Objective

ISTQB® Certified Junior Software Test Engineer with hands-on experience in Manual Testing, API Testing, Web Automation, and Performance Testing. Skilled in Java, Selenium, Cucumber, Postman, and JMeter. Experienced in collaborating with Agile teams and delivering high-quality test coverage through real-world projects and internships.

Technical Skills

- Manual Testing
 - Automation Testing (TestNG – Cucumber)
 - Java Programming Fundamentals
 - API Testing (Postman & Hoppscotch)
 - Git and GitHub
 - Performance Testing (JMeter)
-

Work Experience

- **Manual Software Tester, Pixbyte** | July 2025 – Present
 - Performed Manual testing and write test cases and bug report
 - Performed manual testing on APIs to validate functionality and data accuracy
 - Collaborate with Developers and project manager to resolve bugs
 - **Manual and Automation Software Testing internship, Algoriza & AZM Squad** | July – Sep 2025
 - Learned and applied manual testing fundamentals, including writing test cases and bug reports
 - Worked on a real API testing project, including creating test cases, running APIs, and validating responses.
 - Gained practical experience in test automation using Java, Selenium, and TestNG
 - **Software Testing Engineer internship, Digital Egypt Pioneers Initiative – DEPI (R1)** | June – Nov 2024
 - **Graduation Project:** Web Automation Testing .
 - **Description:** Developed an automation testing project for the AwesomeQA website using IntelliJ IDEA and Cucumber, creating 30 test cases with detailed Extent Reports (HTML, PDF, and screenshots).
-

Education

- **Bachelor of Electronics and Communication, Faculty of Engineering, Mansoura University** | 2019 – 2024
 - **Accumulative Grade:** Good (72.48 %).
 - **Graduation Project:** Secured Firmware Over The Air (FOTA) For ADAS Systems.
 - **Description:** FOTA is essential in the automotive industry to ensure ongoing software improvements, enhance vehicle security, introduce new features, issues efficiently and cost-effectively.
 - **Graduation project grade:** Excellent A+.
-

Certificates

- **ISTQB® Mobile Application Testing** | Aug 2025
Certificate Code: [250806035](#)
 - **ISTQB® Foundation Level v4.0** | Jun 2025
Certificate Code: [250528036](#)
-

Projects

- **CartLow E-Commerce Website, Graduation Project (Algoriza & AZM Squad)**
Developed an automation testing framework for CartLow's e-commerce platform using **Java**, **Selenium WebDriver**, **TestNG**, and **Cucumber**. Followed the **BDD** approach and implemented the **Page Object Model (POM)** design pattern. Managed dependencies with **Maven**.
Project: [GitHub](#).
- **Penguin LMS Website, (Pixbyte)**
Performed comprehensive testing on the Penguin educational platform with a focus on **payment** and **discount systems**. Validated **API and frontend integrations**, tested **coupons, pricing logic, and edge cases** (overlapping or expired discounts). Also verified **WhatsApp integration, live sessions (Zoom)**, and **teacher functionalities** such as exam management and session control.
- **Dorra Print Website, (Pixbyte)**
Performed comprehensive testing on the Dorra Print Website with a focus on the **custom-built design editor (canvas)**. Validated all design tools including text, shapes, layers, alignment, and export functionality. Tested complex user interactions like drag-and-drop, keyboard shortcuts, and undo/redo actions. Leveraged graphic design expertise to test edge cases and ensure UI responsiveness and optimal user experience across various scenarios.
- **The Pass AI Exams & Interviews Website, (Algoriza)**
Performed intensive exploratory testing on The Pass AI Exams & Interviews Website **during a timed bootcamp challenge**. Executed rapid test cycles to identify functional and UI defects within a strict 10-hour timeframe. focusing on critical bug details and effective prioritization according to bootcamp guidelines.
- **Automation Testing for awesomeqa Website, Graduation Project (DEPI)**
Developed an automation testing project for the AwesomeQA website using IntelliJ IDEA. Utilized the **Cucumber** framework to design and execute 30 automated test cases, ensuring the functionality and reliability of the web application. Additionally, generated comprehensive **Extent Reports** in multiple formats, including HTML, PDF, and screenshots, to document the test results.
